How to Add the Where AM I module to BlackBoard

Login to BlackBoard.

On the PHCC tab, choose [Add Module]

When the Add Module page opens, type WHERE in the search box and click [GO]

Once the search results are shown, click [Add] under the Where Am I? header.

Return to the PHCC tab. You will see the Where AM I module now. This shows you which BlackBoard server you are using. You can click the “Switch” link to force a change.

You only need to do this if you are in a classroom with more than 15 students all going to the same location in Bb or if you are experiencing slowness and issues within BlackBoard.
